SUMMARY

Data Analyst with 5+ years of cross-functional experience spanning analytics, ML, LLMs, data automation, ETL and process improvement. Launched multiple self serve solutions reducing resolution time by 70%. Bridge the gap between business objectives and technical implementation by translating complex business needs into scalable, data-driven solutions. Proven track record in stakeholder engagement, compliance monitoring, and reporting to align user needs with business strategy.

SKILLS & CERTIFICATES

- Languages: Python, C++, JAVA, SQL, Go
- Frameworks: Scikit, NLTK, SpaCy, Tensorflow, PyTorch, Selenium, AirFlow, Streamlit, LangGraph
- Tools: Power BI, Grafana, Git, PowerShell, Jenkins, SAP, Worksoft Certify, Snowflake, JIRA, HP-ALM, Docker, Postman, AWS

WORK EXPERIENCE

Systems Data Analyst Aug '23 – Sep '25
UPS, United Parcel Services Mahwah, NJ, US

- Created an NLP tool for analyzing 5TB of Linux logs, for errors, & anomalies, reducing incidents by 42%
- Implemented SSL Dashboard in Tableau, profile metadata with Python scripts, increasing SSL data accuracy & tracking by 30%
- Designed, developed, and maintained scalable ETL pipelines in Databricks (PySpark & SQL) to process CRM (Salesforce & SAP) data, optimizing workflows and improving pipeline reliability, reducing data processing latency by 35%
- Managed 50+ Application Databases by automating regular maintenance and refining stored procedures & app queries
- Designed and implemented automation frameworks using Python and shell scripting to streamline system operations, reducing manual intervention by 40% and improving operational efficiency

Graduate Research Assistant Nov '21 - Dec '22
SERC, Stevens Institute of Technology Hoboken, NJ, US

- Developed NLP pipelines to extract requirements and constraints from documentation, reducing manual review time by over 60%
- Conducted research using transformer-based models (BERT) to mine and summarize engineering literature, identifying trends in aerospace systems and supporting project roadmaps

Associate Analyst Jan '19 - Nov '20
Eaton Technologies Pvt. Ltd. Pune, MH, India

- Designed & developed an Error Tracking Suite (ETS) & catalogued with 700 SAP Change Log impact analysis & resolution procedure, reducing implementation time by 25% & resolution time by 20%
- Developed an ML model which saved 40+hrs by predicting asset acquisition cost estimation/year based on data from the past 3 years comprising different hardware associated attributes and achieved 84% accuracy with Decision tree algorithm
- Led and mentored team of 11 senior third-party consultants for large-scale cross-functional projects, and Org-wide Support Pack
- Designed and implemented a series of Python scripts that automated data collection, cleansing, visualization & analysis, resulting in a 30% decrease in processing time and reducing more than 90% manual dependency
- Analyzed 20+ recurring use cases & developed automation solutions leveraging PowerShell, Python and VBA, reducing more than 90% manual dependency with 95% efficiency

Python Application Developer Intern Jul '18 - Aug '18
Gladiris Technologies Pvt. Ltd. Pune, MH, India

- Engineered a comprehensive Python module integrated with NLP & Google Translate API for unstructured E-mails to English from 300+ News sources. Captured and stored crucial metadata in Postgres DB for enhanced retrieval & analysis

PROJECTS

Real-time Multi-Stock Monitoring & Predicting System [Streamlit, Docker, Spark] Aug '23 - Dec '23

- Engineered & deployed an application to visualize real-time data for multiple stocks simultaneously, utilizing innovative graph overlay techniques; increased data processing speed by 40% and enhanced user experience
- Conceptualized & implemented Long Short Term Memory (LSTM) predicting future stock prices with 72% accuracy

LinkedIn Connection Scraper [Python, Selenium, Beautifulsoap4] Aug '22 - Dec '22

- Engineered and implemented a Python & Selenium web driver to search, send, store resourceful information on LinkedIn to improve reach. Customized connect invite note based on 'Profile Information', improving profile visibility by 30%

EDUCATION

Master of Science – IT Project Management, New England College
Master of Science - Computer Science, Stevens Institute of Technology
Master of Computer Application, Vishwakarma Institute of Technology
